EDUCATION

Swarnim Startup & innovation University, Ahmedabad
BCA - Bachelor of Computer Applications

Running

Red & White Multimedia Education, Ahemdabad
MERN Stack Developer

March 2023 - Jun 2025

PROJECTS

REAL-TIME CHAT APPLICATION (MERN Stack)

Network Programming, Socket Programming — [GitHub Link](#)

[jun 2025]

- Developed a real-time chat application using the **MERN stack** with **Socket.IO** to instant, bidirectional messaging.
- Integrated **JWT-based authentication** to ensure secure user login, session validation, and route protection.
- Designed a **responsive and intuitive UI** using **Tailwind CSS**, ensuring cross-device compatibility.
- Implemented key real-time features including **typing indicators**, live message updates, and in-app notifications.
- Optimized the application for performance and **scalability**, ensuring smooth functionality on various devices and network conditions.

Money Converter App

React.js, JavaScript, REST API — [GitHub Link](#)

[Mar 2024]

- Built a currency converter app using **React** and **JavaScript**, integrating real-time exchange rates from an API.
- Designed an interactive and user-friendly interface that allows users to perform currency conversions with ease.
- I implemented a fully **responsive design** that ensures optimal performance and usability across various devices and screen sizes.

YouTube Clone

React.js, JavaScript, CSS — [GitHub Link](#)

[Mar 2024]

- Built a YouTube clone with **React.js**, featuring video streaming, search, and dynamic content rendering.
- Implemented secure login and session management using **Firebase Auth** for personalized user experiences.
- Designed a fully **responsive UI** ensuring seamless viewing and interaction across all devices.
- Applied **UI/UX principles** to replicate YouTube's core features such as autoplay, sidebar navigation, and video suggestions.

URL Shortener

Node.js, Express — [GitHub Link](#)

[Apr 2024]

- Built a URL shortener app using **Node.js**, enabling users to create short links with customizable aliases.
- Implemented URL redirects, click tracking, and basic analytics for user engagement insights.
- Designed a simple, **responsive UI** ensuring ease of use across devices.
- Optimized for performance, scalability, and efficient management of URL data.

SKILLS

Programming Languages: C, HTML, CSS, JavaScript

Libraries and Tools: React.js

Operating systems & Database Engines: MongoDB, MySQL

Software Tools: GitHub, Visual Studio Code

COURSEWORK

- | | | | | |
|------------------------------|----------------------|-------------|---------------------|-----------|
| • Full Stack Web Development | • React.js | • Node.js | • Express.js | • MongoDB |
| • RESTful APIs | • JWT Authentication | • Socket.IO | • Responsive Design | |

ACHIEVEMENTS

- Achieved **Second Runner-up** position in the **Tech War** organized by Red & White Multimedia Education.

POSITION OF RESPONSIBILITY

- Seeking a **web developer** position in a reputed organization to apply my **educational background** and **technical skills**.
